

Maritime Lead Auditor

This training course is suitable for sea-going and office-based staff, providing delegates with the skills necessary to undertake and manage Company internal audits.

This course is designed to familiarise delegates with the ISM Code, its context, and how to apply the principles of ISO 19011 management system auditing guidelines.

Course Objectives:

Identify key themes in risk, safety, and security management and how audits support the development and continual improvement of Company Safety, Environmental, and Quality Management System, under ISM and applicable ISO Standards

Understand the purpose and benefits of a good audit

Understand the use of standard auditing techniques

Plan, prepare, and lead an audit

Write effective non-conformity audit reports and summaries

Understand the importance of resolving non-conformities and verification of completed corrective actions

Understand ISPS Code and MLC Convention audit verification requirements

Location MSA Dover, MSA Portsmouth and Online

Duration 4 days

Cost from £1,868.75
