

Operational Fire Fighting

Our Operational Fire Fighting training programme is completely tailored to incorporate your safety management system and emergency response procedures. This course will be created with your crew in mind and will involve a consultation to ensure we deliver beyond-compliance training to the right level for you.

- Train at one of our global sites or on your vessel/chosen location.
- Receive a consultation and audit on your firefighting procedures.
- Training is delivered within a time frame to suit you.

The focus will be on any procedures and areas of improvement or concern, but the specific training that will take place will cover:

Effective search and rescue techniques

Hose handling including stairs and ladders, rigging in a hot smoky environment

Safe use on the entry control board

Safe casualty handling

Organise and command fire parties

Effective briefing and debriefing in an emergency

Adaptable training environment

Safety Management System to reality training

Command and control exercises

Location MSA Dover UK, MSA Gibraltar and our partner centre in the Philippines

Duration Normally 5 days (shorter sessions while ship is on port can be accommodated)

Cost POA
