

Maritime Internal Auditor

This course is suitable for sea-going and office-based staff who will be involved in internal audits of a Safety Management System (SMS) within the company they work for, against the requirements of the International Safety Management (ISM) Code.

Course Objectives:

Identify key themes in risk, and safety management and how audits support the development and continual improvement of the Company Safety and Environmental Management System

Understand the purpose and benefits of a good audit

Understand the use of standard auditing techniques

Learn to write effective, non-conformity audit reports and summaries

Understand the importance of resolving non-conformities and verification of corrective actions

Upon successful completion of the training course, delegates will receive a Maritime Internal Auditor training certificate that fulfils the Nautical Institute's recognition standards for continuous professional development.

Location MSA Dover, MSA Portsmouth and Online
