

# Combined Designated Person Ashore & Company Security Officer

## Online Remote Learning

This training course is aimed at senior operational ship managers, covering the content in both the Designated Person Ashore and Company Security Officer modules. By combining these two modules, we can provide you with a flexible and cost-effective teaching method that can be done at home or work.

**Each module will cover:**

**Company Security Officer**

- Knowledge and understanding of the ISPS Code
- Evaluation of ship security vulnerability and threat assessment
- Ensuring appropriate security measures are implemented and maintained
- Understanding of maritime security policy to include mandatory rules and regulations
- Security assessment techniques, questioning, evaluating, and reporting
- Developing, maintaining and supervising the implementation of the ship security plan
- Technical and operational aspects of security management of ship security equipment
- Organisation of ship security audits and on scene security surveys and ship security plan management
- Effective communications with shipboard staff, senior management, and flag administrations

**Designated Person Ashore**

- Context and interpretation of the ISM code
- Issues and common problems for the Designated Person(s)
- Understanding Human Factors and ISM
- Effective Performance Management and KPIs
- Appreciating Legal Issues and Self-Preservation
- Effective Audit Requirements and Techniques
- Effective ISM Reporting, Analysis and Corrective Actions
- Effective Risk Management
- Effective Management of Change

<b>Location</b>	Online Remote Learning
<b>Duration</b>	4 days
